### **Cermount Expansions Welcome New Supplement and Dry Food Business**

Cermount has expanded and is excited to welcome new business! Recent expansions have allowed for growth in supplement blending, encapsulating, and packaging as well as increased speeds in packaging dry food and beverages.

Cermount is flexible with a variety of packaging options, production run sizes, and an overall ease of market entry. Recent investments include new vertical and horizontal form-fill-and seal equipment, additional filling lines, and a high-speed Bosch encapsulation machine. Additional square footage was added to accommodate new growth and dedicated line space for dietary supplements blending, encapsulation, bottling, and powder filling opportunities.

Current SQF audit score of 98, Cermount offers quality-centered contract manufacturing while employing an all-inclusive and mission-driven workforce. Along with its parent company, Transylvania Vocational Services (TVS), and ongoing contracts with the US Government for food banks and the US Military, Cermount has continued to thrive and expand its private label food manufacturing and supplements business during these last two years.

“Cermount plans to continue to expand our facility and capabilities to accommodate the growing needs of our customers and the market,” said VP of Business Development and Marketing Beth Rich. “We also have exciting new capabilities planned for the upcoming year—such as single serve cups, different pack sizes and styles, and additional material offerings. We have been fortunate that our recent growth has allowed for us to make these types of investments back into our organization.”

Cermount is responsive, easy to work with, and here to help meet the start-to-finish manufacturing needs of most any project requirements.

###

“Certified Quality. Trusted Service,” the Cermount motto, is built on the mission of its parent company, Transylvania Vocational Services (TVS), providing competitive employment to adults with disabilities for over 50 years. TVS has a state-of-the-art dry food manufacturing facility fulfilling contracts for the federal government. Cermount’s new capabilities and expansion combined with TVS’s mission and expertise make for a winning combination and why both are trusted and respected by industry partners. By “manufacturing with a mission” these organizations work to enhance the dignity and quality of life of individuals with disabilities and barriers to employment.
